Global super sire inspected by Colin in 2016 as the best Angus bull he saw. A proven calving ease sire, elite curve bender with calving ease, growth performance, maternal and carcass quality. His low birthwt progeny have great type, natural thickness, muscle shape, superior structure & are functional easy fleshing cattle. Use his sons with confidence over heifers. His daughters in production are moderate, efficient ideal deep body types with beautiful udder shape & attachment. Capitalist 316 sons have topped southern Aust 2021 sales & sold to \$240K at SAV Angus 2021 Bull Sale in the US. Dont miss his sons at Lots 2, 9, 15, 16, 17, 18, 20, 33, 34, 39 & 42.

We still love TheRock sons & daughters. They continue to combine it all in an easy calving, low birthwt, curve bending heavy growth package. Super quiet, great structure with bonus carcass value. Add real muscle & powerful type back into your angus herd, not just numbers & you will love TheRocks too. If you need a bull to tick all the boxes check out TheRock sons at Lots 7, 11, 12, 27 & 38.

Opportunity offers powerful Angus type, trait leading growth, carcass wt, yield & the added profit driver- feed efficiency. With less than 50 calves in Australia & 70% in our herd over 3 seasons, there has been consistent calving ease & moderate birth wts of 33.5 kg, 34kg & 35 kg av each year. US data with 300+ progeny confirms this - his Aust EBVs predict low calving ease & high birth wt have not been our experience. We know our Opportunitys have good calving ease & moderate birth wts, & happily recommend their use on cows, especially to powerup Bos Indicus or Euro X for a quality heavy efficient black hided product. Opportunity sired the top seller last year and also the top marbling scan bull & heifer this year. Sire of Lots 5, 6, 8, 28, 29, 30, 45 & 50.

Unanimous offers consistent proven genetics, excellent soundness with easy finishing all in a well structured powerful breed type package. His sons have great spring of rib & capacity for tough seasons with added great hindquarter setup for female replacements. The one son this year at Lot 44.

Great calving ease, clean fronted, deep bodied with heavy muscle expression & great moderate Angus style. Good temperament, structure & feet & from one of the best angus cows ever Isobel Y69. Colin inspected Compass in the US in 2016 & we have been impressed by his progeny. He is one of the best sires we have used in 30+ years. His sons were sale toppers in 2019 & his 2 & 3yo daughters weaned heavy calves, are easy keeping & rejoined well. Use his sons with confidence to add kilos, carcass, doability & type, plus leave outstanding replacements to rebuild herds. We continue to use Compass & his full brother 38Special. Compass is the sire of **Lots 10, 19, 25, 26, 35, 36, 41, 48 & 49.**

EF Prime Quarter is a deceased VAR Generation 2100 son from the same stud as top sire EF Commando. He was a long bodied grandson of great Sandpoint Blackbird 8809 cow we used for his high calving ease, high marbling & growth, as well as maternal value. His progeny have shown impressive growth, muscling and angus type. Along with Texas Angus we secured the remaining limited Aust semen on the bull and have more progeny due this year. Check his sons out at **Lots 3, 4, 21, 22, 32 & 51.**

If we could get more Rancher semen we would be using him again & again. Sleep all night heifer bull with small calves, a great calving ease front & very impressive growth, muscling & type with added marbling & great maternal value. These Rancher bulls continue to impress with simply awesome performance from heifers in drought & fire. We think enough of the Ranchers to select a terrific son to lead off the sale at Lot 1. If you want calving ease bulls that will tick all the boxes dont miss these **Lots at 1, 13, 14, 23, 24, 37, 40 & 43.**
