# 2025 Alumy Creek Angus Bull Sale

Welcome to our 35th Annual on property and online Angus Bull Sale.

**Welcome to our 35th Annual on property and online Angus Bull Sale.** Great to see a turnaround in the season with improved rain across many parts of our lucky country, a promise of good seasons ahead, with a record excess in some areas and yet still desperate need in others. Everyday remains one day closer. The future continues bright for beef according to the analysts with forecasts of improved returns and continued financial recognition in the saleyards with premiums received for quality Angus over commodity type cattle. Producers continue to demonstrate their confidence in Australian agriculture by taking the opportunity to future proof their profits building feed efficiency performance into their herds, utilizing quality sustainable naturally polled black Angus premium genetics that are adaptable to our varied environmental grazing conditions around the country, providing food security to our expanding global markets.

This year we are pleased to offer an **impressive draft of moderate framed quality beef** bulls, an exciting selection of powerful, **thick, heavily muscled carcass** bulls with many of them **calving ease curve bending bulls very suitable for heifers or cows**. The bulls are **great Angus type** being **long bodied** and **strong topped** with **deep spring of rib, added thickness** and consistent **natural muscling**. The AI sires of these bulls are some of the best global genetics available within the Angus breed. It has been great to see so many Alumy Creek clients producing the champion pens and topping the weaner sales again this season. Even better the **consistent reports** of how well **Alumy Creek bulls thrive** in a wide variety of environments with progeny producing **superior performance** on grass and in the feedlot.

We always select to breed quality Angus cattle that can produce a profit under commercial conditions with **market flexibility** to target the domestic, heavy grassfed or grainfed markets. Because we retain the sisters to the bulls we sell, the mature cow size of our cattle must be **sustainable** in our tough grazing environment, with female **cow longevity** adding to herd profit. We apply stiff selection pressure for **fertility**, our heifers must calve as 2-year-olds unassisted and must go back in calf quickly to **produce a calf each and every year**. Clients comment on the **consistency, quality** and performance of their Alumy Creek sired replacement females. All the bulls in the catalogue will produce this valuable type of **easy keeping, high fertility, great longevity replacement females** bred to work hard bringing in a good calf every year. These are sustainable **profit traits for future performance** from your cow herd.

We believe in using **temperament, structure, EBVs and genomics** as equal tools in the selection box for balanced sustainable cattle and we don't just add up the EBV numbers or single trait select. Our selection focus produces cattle that are **easily born**, can achieve **extra performance kilos** on **grass** in the paddock with the **quality carcass potential** to also excel in the **feedlot**. We continue to embrace new technology with **all bulls DNA Genomic tested and sire verified** so have confidence with your purchase.

The bulls have **excellent TACE EBV figures, many with top 1-10% EBV datasets** for the **multiple traits** we have selected for over the past 30 years. Over a third of the 2025 sale draft is **top 25% or better** for **added calving ease**. Half of this sale draft have **lighter** than Angus breed average **birth weight** with two thirds of the sale draft is **also top 25%** of the breed for **200, 400 and 600 Day growth** traits for **born easy, curve bender grow fast** progeny performance. Half the draft is top 50% or better for **EMA muscling** with 50% of the draft also top 50% or better for **IMF Marbling**. Don't miss **Lot 3 NKE23U131** for balanced growth, **+ 12.6 EMA** and **+4.5 IMF**. 40% of the draft is top 25% or better for **Feed Efficiency** for added profit conversion. Be sure to check out **Lot 14 NKE23U091** (a full brother to our retained stud sire NKE22T084) combining **top 1% Feed Efficiency** with elite **top 1% growth traits**.

The 2025 sale draft offers an outstanding selection of bulls with **balanced performance** across the **multiple selection \$ indexes** suiting various production systems. **Several lots have top 1% & 2% elite index values**. These breed rankings are measured against all the performance recorded Angus cattle in Australia & NZ. Please read the new EBV and Selection Index explanations to fully utilize these and apply these selection tools.

All are quality maternal profit herd builders should you wish to retain easy care top fertility and longevity female replacements from the sale draft bulls for your herd. As usual our bulls will present in strong forward paddock condition, ready to go out and work well for you. Everyone comments on how their Alumy Creek bulls are tough, easy-care cattle that only improve through the joining season.

This year sees another draft of **16 long bodied well-muscled sons** by **Mogck Entice** (by Sydgen Enhance). Entice was only lightly used in Australia be sure to check his sons out. With 200 calves in our herd he adds great **docility**, low to **moderate birth weights**, achieves **fast growth** and **big carcass weight, high feed efficiency** and **feedlot performance**- anyone who already has used his sons knows they are perfect to inject profit and quality into your program. The Entice sons are long, deep, thick made bulls with a **great hind quarter setup** to build calving ease into their **replacement daughters** who have good udders and have become terrific productive cows for us. They are slick coated attractive correct cattle, **Entice sired the sale toppers** in our 2024 bull and female sales, we retained his son T084 (full brother to Lot 14 U091) as a walking sire in our stud herd the past 2 seasons. **Lots 3, 5, 6, 11, 14, 18, 22, 25, 26, 31, 40, 45, 54, 58, and 69.**

The proven all-rounder **Ferguson Trailblazer** (by the same sire as Landfall New Ground N90) has **11 sons** offering standout Angus phenotype plus **calving ease, low birth weight, big growth** with **carcass** and **marbling** performance. Use his **thick, moderate framed, deep flanked** sons over heifers or cows for added profit to your feeder cattle. His daughters have made us easy keeping productive cows. **Lots 1, 8, 13, 15, 16, 17, 28, 33, 60, 61 and 63.**

If you are looking to add **big muscle expression, more depth** and **added shape** to your calves check out the **slick coated** powerfully built **first Australian sons** of new season sire **Connealy Big Valley**. Outstanding **thickness, big hindquarter**, use these Big Valley sons to add **performance** and improve **carcass merit**. Connealy pedigree always makes for efficient replacement females too. Don't miss **Lots 2, 4, 9, 56 and 66**.

New season sire the \$200K **Hoffman Thedford** brings **elite maternal genetics, calving ease, growth** with **feed efficiency** and **added muscle** producing **very quiet, eye catching, slick coated** correct made progeny. First sons have sold to \$150K. Colin was super impressed with his grandsire on inspection in the US and we are very pleased with both our Thedford progeny. **Lots 21, 29, 41, 51 and 67**.

The calving ease, well-muscled maternal and carcass specialist and LD Capitalist 316 son **RR Endeavor** has **13 impressive big capacity, thick very well- muscled sons** all from 1<sup>st</sup> calf 2yo heifers in the draft. If you want high profit calves from your heifers these bulls offer unparalleled **elite top 1% calving ease, low birth weight** and **big growth** with easy finish **positive fats** and high value carcass **EMA and marbling values** with impressive Angus type. **Lots 12, 20, 24, 35, 43, 47, 48, 50, 52, 55, 62, 64 and 65**.

Second season sire **LT Revered** (by popular maternal sire Basin Rainmaker 4044) brings **docility, calving ease** with tremendous **growth** and elite selection index performance plus added **maternal value** and perfect udders in replacement females. Check out the slick coats, great Angus type and elite heavy growth weights and balanced performance from his **6 sons** on offer. **Lots 7, 23, 37, 44, 53 and 57**.

Proven **calving ease** sire **Syngen Bonus** brings **muscle** and elite **marbling** carcass quality to his progeny which have **great Angus shape** and have been high sellers at both the Texas and Paringa Angus studs. For easy born high value calves from your heifers check out his **2 sons** selling as **Lots 32 and 34**.

We also offer **Lots 38 and 68** the last **2 sons** of our Australian pedigree walking sire **Bridgewater Quantum Q007**. His sons make great heifer bulls with growth plus quality carcass and marbling value. We also offer the last 2 sons of our Rennylea Kodak/ Pathfinder Genesis Australian pedigree sire **Warrawee Quorum Q19**, see **Lots 27 and 42**. We offer **Lot 10** a terrific last son of our elite **high marbling** homebred sire **AC Sandman N081 (+5.7 IMF)** who was our heifer joining bull for many years.

We are excited to offer **Lot 36** a yearling son of **Bullic R65** (by Musgrave Avenger) our new heifer joining sire and **Lot 39**, a very smooth made son of our new walking sire **Ben Nevis Sanctum S264** (by Temania Pythagorus), brother to the 2023 Ben Nevis sale topper.

**Our quality draft of locally bred, raised Tenterfield tough bulls will be offered for sale at 1pm Friday 30 May 2025 online with AuctionsPlus and on property at Coldawinda, Tenterfield NSW, just 10 minutes south of the Qld border on the New England Hwy. Photos and videos are available online and the bulls are available for inspection on Thursday 9 May at our sales complex at Coldawinda, Scrub Road, Tenterfield or on sale day from 10am or by prior arrangement with Colin on 0429431900 and any of the agents.**

As usual **phone bidding** is also available **through the agents** and **online with Auctions Plus**. Don't forget to pack an extra coat if you are coming on property to enjoy our Tenterfield winter climate. Please call us if you would like a chat about any of the bulls.

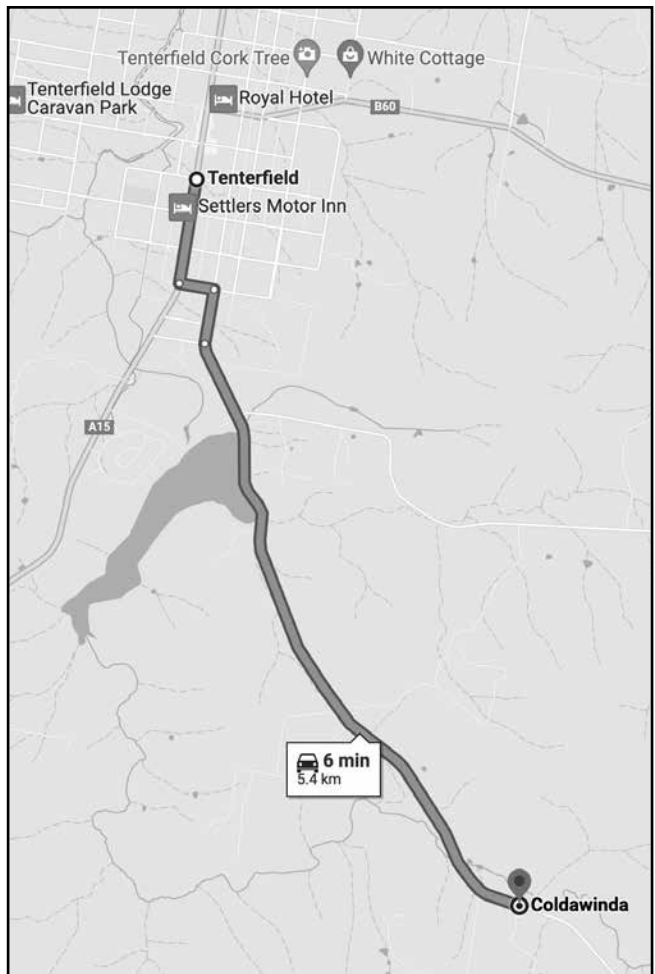

**Colin, Lisa, Tom and Lach Keevers**

**alumycreekangus.com.au**

**0429 431 900**

## DIRECTIONS

'Coldawinda' is located 4kms south east of Tenterfield at 420 Scrub Road. Turn East off the **New England Hwy** at **Clifton Street**, on the Southern End of Tenterfield. Travel one block to turn right at the T intersection onto **Scrub Road**. Travel **4kms** on bitumen with 'Coldawinda' yards on the Right.

# Sale details

## SALE DATE AND PRIOR INSPECTION TIME

The sale will commence at **1pm on Friday, 30 May 2025**, on property and online with Auctionsplus. Cattle will be penned by 10am on Sale Day and we strongly recommend **presale inspections which are by arrangement via the agents or Colin or on the Inspection Day Thursday 9 May from 10am to 1pm. If you buy online or over the phone sight unseen, we happily stand behind the description of our bulls on offer.** All lots can be viewed online at AngusAustralia, Auctionsplus or [www.alumycreekangus.com.au](http://www.alumycreekangus.com.au)

## REFRESHMENTS

As usual **all weather undercover open shelter** is available at our sale complex. Whilst we have heaters, it may be cold so be sure to pack an extra coat. **Lunch REFRESHMENTS** will be available at the sale.

## SELLING SYSTEM

Sale of animals will be conducted under normal auction terms and conditions and will be interfaced online with AuctionsPlus. Please **register and complete the buyers training with AuctionsPlus at least 24 hours presale and log in early if bidding online.** Your livestock agent will assist, and **PHONE BIDDING IS AVAILABLE if you prefer**—please contact any of the agents to organize. Your PIC must be supplied to the selling Agents to obtain a buyer's number. Successful purchasers must give written advice regarding transport arrangements, with cattle available for delivery at the conclusion of the sale. The agents will assist with your transport requirements. All animals are sold *exclusive* of GST.

## INSURANCE

Is available from the agents on the day. We strongly recommend insurance on your purchases.

## HERD HEALTH

All sale bulls are **tested negative PI** (Persistently Infected) and vaccinated against **Pestivirus** with **Pestigard** vaccine. They are fully vaccinated with **7 in 1** (for **Clostridial** and **Lepto**), **Vibrio** and **3 Day Sickness** vaccine only requiring annual boosters. **Johnes Disease:** Alumy Creek Angus has over 25 years negative tests as a MN3 herd in the old JDMAP. We can currently claim a JBAS 7. Our bulls are eligible to enter all states without further testing. **Cattle Tick:** Alumy Creek Angus is located in a cattle tick free area. Bulls can easily be held and blooded if required by arrangement. **Parasites:** Bulls were treated with Fasinex and Cydectin in April 2025.

## MANAGEMENT

All Alumy Creek bulls carry a freeze brand for easy ID in the paddock. Alumy Creek sale bulls are quiet, well-mannered cattle used to being handled on foot, with dogs, ATVs and vehicles. They are rigorously screened for their temperament, but sale day places extra stress on the bulls and this is no guarantee they will not misbehave under the pressure of sale day.

## FERTILITY

All bulls have passed a veterinary physical examination and crush side semen test.

## GUARANTEE

**Bulls are sold with a guarantee as a calf getter valid from 12 months of the sale date.** The vendor must receive written notification together with a certificate from a registered veterinarian stating the nature of any infertility claim before the expiration of that period. Animals injured or lost as a result of accident, negligence or any disease, are not covered by this guarantee. Vendor liability relating to fertility claims will not exceed the purchase price of the animal and are limited to a credit equal to the purchase price less the salvage value which may be utilized at a future Alumy Creek sale. **Check your bull purchases during the breeding season and talk to us if you think there is a problem.**

## SIRE VERIFICATION and DNA HDi50K TESTING

All bulls have been **sire verified** (SV) and **genomic HDi50K** tested. They can be used to breed registered calves without further testing. The performance recording and genomic results are single step incorporated into TACE Breedplan to produce Estimated Breeding Values (EBVs). Many bulls are in the elite top 1-2% of the Australian/ New Zealand drop for Angus seed stock. Talk to Lisa if you need more information.

## HEALTH AND SAFETY OF VISITORS

**Visitors enter the pens of their own risk. Dogs are strictly not permitted at the sale. Children under 16 years old are not permitted to enter the sale pens.** Our bulls are known to be of good temperament under normal conditions. However, sale day is not 'normal conditions'. If you enter the pens, take note of your surrounds and be conscious of your safety. Do not crowd the bulls or loiter in the pens. Please use common sense and always be alert. Do not be alarmed, but it is critical that visitors pay attention to the risks associated with cattle and sale day.

## SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However neither the vendor, the selling agents nor Angus Australia make any representations about the accuracy, reliability or completeness of any information in this catalogue, including but not limited to pedigree, DNA information, EBVS and Index Values, and do not assume any responsibility for the use or interpretation, accuracy or completeness of the information included in the catalogue, nor for the outcome (including consequential loss) of any action taken based on this information. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.  
 PV: both parent have been verified by DNA  
 SV: the sire has been verified by DNA

## TERMS AND CONDITIONS OF SALE

- Terms are strictly cash or approved cheque on the day of sale, unless prior arrangements have been made with the Auctioneer before the fall of the hammer.
- Subject to the reserve price, the highest bidder shall be the purchaser.
- In the event of a disputed bid, the auctioneer shall be the sole arbitrator and his decision shall be final.
- The auctioneer may refuse to accept any bid, which, in his opinion, is not in the best interest of the vendor and shall have the right to refuse any such bid without giving any reason.
- Where the vendor reserves the right to bid at the auction in respect of a lot and instructs the auctioneer to make more than one bid on his behalf, the auctioneer shall, prior to submitting the lot for sale by auction, announce in a clear and precise manner the number of bids reserved by the vendor in respect to that lot.
- A bidder shall be deemed to be a principal unless, prior to the bidding, he has given to the auctioneer copy of written authority to bid for or on behalf of a person.
- The last price called by the auctioneer shall be the amount at which the lot has been sold.
- A bid cannot be made or accepted after the fall of the hammer.
- All lots will be at the purchaser's risk immediately after the fall of the hammer and no responsibility will be incurred by the auctioneer or vendor for their safekeeping. No exceptions shall be taken to any of the lots on delivery the whole having been open for inspection by the purchaser prior to the sale and on no account will any allowance be made.
- Every person on the auction premises before, during and after the sale shall be deemed to be there at his own risk and with notice of the conditions of the premises. Such person shall have no claim against the auctioneer or vendor in respect of any injury sustained or any accident, which may occur from any cause whatsoever.
- All cattle will be sold GST exclusive. GST will be added to the purchase price.

**A 2% Outside Agents Rebate is available to Licensed Agents introducing purchasers in writing 24 hours prior to sale and settling on their behalf within 7 days of invoice.**

# BRINGING YOUR NEW BULL HOME

When purchasing a bull, care and handling after the sale can be as important as the purchase itself. Looking after your bull well during the initial stages of his working life may ensure longevity and success within your breeding herd.

**Purchase** Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

**Delivery** When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering.

After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

**If you use a professional carrier:**

- Make sure the carrier knows which bulls can be mixed together.
- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

**Arrival** When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

**Mating new young bulls** Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later. When the young bulls are working, inspect them regularly and closely.

**Managing Older Herd Bulls** Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

## During mating

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

**Northern Australia** Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straightbred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

**Adaptation** The key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

**Purchase in cooler months** Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

**Change of feed source** When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

**Managing Cattle Ticks** For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	<b>CEDir</b>	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>CEDtrs</b>	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>GL</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	<b>BW</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	<b>200 Day</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	<b>400 Day</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	<b>600 Day</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	<b>MCW</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	<b>DtC</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	<b>SS</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	<b>CWT</b>	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	<b>EMA</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>P8 Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>RBV</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	<b>IMF</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	<b>NFI-F</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	<b>Doc</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	<b>Claw Set</b>	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate a lower score.
	<b>Foot Angle</b>	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate a lower score.
	<b>Leg Angle</b>	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a lower score.
Selection Index	<b>\$A</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	<b>\$A-L</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.  The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.  While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

Selection Indexes	<b>\$D</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are either finished using pasture, pasture supplemented by grain, or grain (e.g. 50 -70 days) with steers assumed to be slaughtered at 510kg live weight (280kg carcase weight with 12mm P8 fat depth) at 16 months of age.	Higher selection indexes indicate greater profitability.
	<b>\$D-L</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are either finished using pasture, pasture supplemented by grain, or grain (e.g. 50 -70 days) with steers assumed to be slaughtered at 510kg live weight (280kg carcase weight with 12mm P8 fat depth) at 16 months of age.  The \$D-L index is similar to the \$D index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.  While the \$D aims to maintain mature cow weight, the \$D-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.
	<b>\$GN</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers are assumed to be slaughtered at 800 kg live weight (455 kg carcase weight with 30 mm P8 fat depth) at 24 months of age, with a significant premium for steers that exhibit superior marbling.	Higher selection indexes indicate greater profitability.
	<b>\$GN-L</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers are assumed to be slaughtered at 800 kg live weight (455 kg carcase weight with 30 mm P8 fat depth) at 24 months of age, with a significant premium for steers that exhibit superior marbling.  The \$GN-L index is similar to the \$GN index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.  While the \$GN aims to maintain mature cow weight, the \$GN-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.
	<b>\$GS</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 650 kg live weight (350 kg carcase weight with 12 mm P8 fat depth) at 22 months of age. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.	Higher selection indexes indicate greater profitability.
	<b>\$GS-L</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 650 kg live weight (350 kg carcase weight with 12 mm P8 fat depth) at 22 months of age. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.  The \$GS-L index is similar to the \$GS index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.  While the \$GS aims to maintain mature cow weight, the \$GS-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.
	<b>\$PRO</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd based in New Zealand that targets the production of grass finished steers for the AngusPure programme. Steers are assumed marketed at approximately 530 kg live weight (290 kg carcase weight with 10 mm P8 fat depth) at 20 months of age, with a significant premium for steers that exhibit superior marbling.	Higher selection indexes indicate greater profitability.
	<b>\$T</b>	\$	Genetic difference between animals in net profitability per cow joined in a situation where Angus bulls are being used as a terminal sire over mature breeding females and all progeny, both male and female, are slaughtered. The Angus Terminal Sire Index focusses on increasing growth, carcase yield and eating quality. Daughters are not retained for breeding and therefore no emphasis is given to female fertility or maternal traits.	Higher selection indexes indicate greater profitability.

## Buyer's option to opt out of disclosing personal information to Angus Australia

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

I, the buyer of animals with the following registration numbers .....

**DO NOT** consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.

Signature: ..... Date: .....

Please forward this completed consent form to: **Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350.**

If you have any queries, please telephone **02 6773 4600** or email **office@angusaustralia.com.au**

## Buyers instruction sheet

**Alumy Creek Angus 35th Annual Bull Sale Friday 30 May 2025**

*(no verbal instructions will be accepted)*

Name: ..... PIC: .....

Postal address: .....

Phone: ..... Email: .....

Lots purchased: ..... Herd ID .....

**All Bull registrations will be transferred with the Australian Angus society unless the purchaser notifies the vendor otherwise.**

Delivery address: .....

Transport instructions: .....

Signature of purchaser or agent .....

### Special notice to all buyers
